The Horton Keyboard Capo™

Visual reference: the six diatonic chords in all 12 major keys · Monte Horton

Your left hand moves. Your right hand doesn't. The left hand plays root octaves through the progression. The right hand locks onto scale degrees **5 – 1 – 2 – 5** of the key and never moves.

Each page shows one key. Every panel uses the same right hand (colored dots) over a different left-hand root (gray dots). Right-hand notes on black keys are shown by coloring the key itself.

Chord	Left hand	What you hear (key of G)	Character
I	G	Gsus2	open, clean, home
ii	A	A7sus4	floats between major and minor; leans to V
iii	B	Bm7(♭13), heard as G/B	bittersweet passing chord
IV	C	C6/9 (no 3rd)	lush and wide
V	D	Dsus4	suspended; wants to resolve
vi	E	Em7(11)	moody, modern

To get started: find the 5 – 1 – 2 – 5 shape in your key and lock it in. Practice the left hand alone through I – IV – V – vi. Then add the right hand. Don't move it; just listen to what each chord becomes.

The vii° chord is left out on purpose: over the locked shape it clashes, so worship progressions rarely use it.

"The goal isn't complexity. The goal is to sound like you're doing more than you are."
